SOVIET PHYSICS – CRYSTALLOGRAPHY: AUTHOR INDEX FOR Vol. 2, 1957

(Russian Original Vol. 2, 1957, The Journal Crystallography of the Academy of Sciences, USSR)

Abdullaev, G. K. Some New Simple Forms of Pyrite - 307.

Abov, Iu. G., see Liashchenko, B. G. - 59.

Akishin, P. A. and V. P. Spiridonov. Electron Diffraction Analysis of the Molecular Structures of Halides of Group II Elements - 472.

Akulenok, E. M., Kh. S. Bagdasarov and V. Ia. Khaimov-Mal'kov. The Problem of the Effect of Mechanical Agitation and Ultrasonic Vibrations on the Process of Impurity Trapping by Single Crystals - 193.

Aleksandrov, K. S. Propagation of Elastic Shear Waves in a Crystal Bent Around a Specific Direction - 134.

Aleksandrov, K. S., see Chumakov, A. A. - 699.

Aliavdin, N. V., N. N. Sheftal' and Z. I. Frolova. Growing Uniform Crystals of Rochelle Salt from Strongly Supersaturated Solutions - 188.

Andreeva, N. S., N. G. Esipova and M. I. Millionova. Concerning the Peculiarities of Collagen Structure - 467.

Anikin, L. N. Hydrothermal Synthesis of Scheelite - 191.

Antsishkina, A. S., see Porai-Koshits, M. A. - 366.

Bagariatskii, Iu. A. Crystal Structure of the Metastable Phase Formed During the Tempering of Cu – Sn Alloys Containing 24-27% Sn - 277.

Bagariatskii, Iu. A. and Iu. D. Tiapkin. The Mechanism of Structure Transformations in Agehardening Alloys Based on Nickel - 414.

Bagdasarov, Kh. S., see Akulenok, E. M. - 193.

Bagdasarov, Kh. S. and V. Ia. Khaimov-Mal'kov. Some Experimental Data on the Nature of the Formation of Etched Figures in an Ultrasonic Field - 309.

Baranskii, K. N. Excitation of Ultrasonic Vibrations in Quartz - 296.

Batsanov, S. S. and V. I. Pakhomov. On the Change in the Nature of the Chemical Bond When the Coordination Number is Changed - 176.

Batsanov, S. S. Refractometric Determination of the Structure of Complex Cobalt Compounds - 259.

Bazhenov, V. A. Wood as a Piezoelectric Texture - 104.

Beliaev, L. M., V. A. Perl'shtein and V. P. Panova. Activator Distribution in Alkali Halide Crystals Studied With Radioactive Tracers - 435.

Beliustin, B. V. On the Equilibrium Form of Crystals in a Gravitational Field - 583.

Belov, N. V. and E. N. Belova. Mosaics for 46 Plane (Shubnikov) Antisymmetry Groups and for 15 (Fedorov) Color Groups - 16.

Belov, N. V., N. N. Neronova and T. S. Smirnova. Shubnikov Groups - 311.

Belov, N. V. New Silicate Structures - 361.

Belov, N. V. Concerning the Course in Geometric Crystallography for Physicists - 667.

Belov, N. V. Concerning the Tetrahedral (T = 23) and Gyrohedral (O = 432) Groups - 712.

Belov, N. V. A Theorem on the Primitiveness (Emptiness) of the Unit Cell of a Crystal Lattice - 715.

Belova, E. N., see Belov, N. V. - 16.

Bleidelis, Ia. Ia. Crystalline Structure of Cis – $[Pt(NH_3)_2(SCN)_2]$ - 270.

Bleidelis, Ia. Ia. and G. B. Bokii. The Crystalline Structure of the Trans-Diamminedithiocyanide of Divalent Platinum - 274.

Bogdanov, S. V., B. M. Vul, R. Ia. Razbash. Piezoelectric Shear Modulus of Polarized Barium Titanate - 111.

Boiarskaia, Iu. S. Investigation of the Anisotropy of Hardness of Single Crystals of PbS by Scratching - 702.

Bokii, G. B. and Kozlova, O. G. Crystallographic Criteria in Selecting Fluorspar for Growing Artificial Crystals of Optical Fluorite - 152.

Bokii, G. B., see Bleidelis, Ia. Ia. - 274.

Bokii, G. B. and G. A. Kukina. Crystallochemistry of Complex Divalent Platinum Compounds (The Effect of Transinfluence in Crystalline Substances) - 395.

Bokii, G. B. and N. A. Parpiev. X-Ray Structural Analysis of Crystals of $[Ru(NH_3)_4(NO)(OH)]Cl_2$ - 681.

Boksha, S. S. New Method of Producing Very High Gas Pressures - 195.

Breido, I. Ia., see Leiteizen, L. G. - 286.

Briatov, L. V., see Butuzov, V. P. - 659.

Bublik, A. I. Electron Diffraction Study of the Structure of Thin Films of Molten Tin - 240.

Bublik, A. I. and A. G. Buntar'. Determination of the Radial-Distribution Function for Atoms in a Liquid Metallic Alloy from Electron-Diffraction Data - 246.
Buntar', A. G., see Bublik, A. I. - 246.
Butuzov, V. P. Study of Phase Transformations at Very High Pressures - 533.
Butuzov, V. P. and L. V. Briatov. An Investigation of Phase Equilibria in a Part of the System $H_2O - SiO_2 - Na_2CO_3$ at High Temperatures and Pressures - 659.
Bykov, V. N., S. I. Vinogradov, V. A. Levdik and V. S. Golovkin. A Double Crystal Neutron Spectrometer - 626.

SOVIET PHYSICS – CRYSTALLOGRAPHY: SUBJECT INDEX FOR Vol. 2, 1957

(Russian Original Vol. 2, 1957, The journal Crystallography of the Academy of Sciences, USSR)

Absorption spectra of crystals containing isomorphic impurities, vibrational structure of - 180.
Acid-amine complexes of nickel, crystal structures of - 366.
Activator distributions in alkali halide crystals studied with radioactive tracers - 435.
Adsorption of methylene blue on montmorillonite - 68.
AgCl crystals, etch pits on - 544.
AgCl crystals, slip lines in - 265.
Ag-Cu, electron diffraction study of decomposition of supersaturated solid solutions - 610
Al-Cu, electron diffraction study of decomposition of supersaturated solid solutions - 610.
Age-hardening alloys, nickel, mechanism of structure transformation - 414.
Alkali halide crystals, activator distribution, study by radioactive tracers - 435.
Alloys, aluminum, electron diffraction study of oxidation - 620.
Alloys, Sb-Ir, metallographic and x-ray study - 42.
Alterations in the dielectric properties of Rochelle salt crystals exposed to x-rays - 293.
Aluminum alloys, electron diffraction study of oxidation - 620.
Anisotropic phases, plant transitions and critical phenomena in - 139.
Anisotropy of hardness in PbS crystals - 702.
Anomalous bisectrix dispersion in organic pigment crystals - 75.
Ansheles, Osip Markovich, in memory of - 709.
Antimony-iridium system, metallographic and x-ray study - 42.
Antimony sulfide, amorphous, electron diffraction study - 251.
Antisymmetry groups, mosaics for - 16.
Antisymmetry of finite bodies - 5.
Antisymmetry of nucleation surfaces - 19.
Apparatus for measuring very small displacements of oscillating crystals - 643.
Apparatus for the study of crystal growth under the microscope - 761.
Atomic chains and the fine structure of glass - 487.
Atomic crystal structures of complex acid-amine nickel compounds - 366.
Atoms, in crystals, representation as symmetrical bodies - 445.
Au_2O_3, structure - 674.
Automatic synthesis of a two-dimensional representation of atomic structures - 353.

Barytes, epitaxy of $KMnO_4$ and $KClO_4$ on - 706.
Barium titanate, piezoelectric shear modulus - 111.
Barium titanate, polarized ceramic, dielectric and piezoelectric properties - 115.
$BaSnO_3$-$PbTiO_3$ system - 225.
$Be_{22}Mo$, $Be_{12}W$ and $Be_{12}Ta$, structures - 730.
Bent crystal, propagation of shear waves in - 134.
Benzophenone, dielectric, elastic and piezoelectric properties - 699.
Beryllium-copper, changes in mosaic structure during ageing - 500.
Bisectrix dispersion, anomalous, in organic pigment crystals - 75.
Boundaries of polygonal blocks and slip lines, etch pits on, in silver chloride crystals - 544.

Camera, single-crystal x-ray diffraction, for precise determination of lattice parameters - 694.
Captax - 33.
Carbides of transition metals, electron diffraction study of - 380.
Carbon, state of, in annealed silicon steel - 684.
Cast iron, high-strength, morphology of spherulitic graphic in - 653.
Celadonite, electron diffraction study - 173.
Celadonite, structure determination by electron diffraction - 388.
Chain molecules, packing of - 637.
Change in the nature of the chemical bond when the coordination number is changed - 176.
Close packing, dividing mechanisms based on - 163.
Cobalt complexes, refractometric determination of structure - 259.
Cobalt di(p-toluidine) dichloride, structure - 723.
$[Co(H_2O)_4]$ $[GeF_6]$, structure - 602.
Collagen, peculiarities of structure - 467.
Color groups, mosaics for - 16.
Complex compounds, crystal structures of - 403.
Complexes, Pt (II), crystal chemistry - 395.
Concepts of organic crystallography - 454.
Coordination number and nature of the chemical bond - 176.
Copper-aluminum, electron diffraction study of decomposition of supersaturated solid solutions - 610

Crystal chemistry, organic - 454.
Crystal form , study of - 323.
Crystal growth and evaporation, dynamics of - 426.
Crystal growth, macroscopic theory of formation of dislocations in - 587.
Crystalline structure of Cis-$[Pt(NH_3)_2(SCN)_2]$ - 270.
Crystalline structure of the trans-diammine-dithiocyanide of divalent platinum - 274.
Crystallization at constant temperature and supersaturation, kinetics of - 745.
Crystallization, oriented, $KMnO_4$ and $KClO_4$ on barytes - 706.
Crystallochemical investigation of the structure of some complex compounds - 403.
Crystallochemistry of complex divalent platinum compounds (the effect of transinfluence in crystalline substances) - 395.
Crystallographic criteria in selecting fluorspar for growing artificial crystals of optical fluorite - 152.
Crystallography, development in USSR in last 40 years - 573.
Crystallography, geometric, course for physicists - 667.
Crystal physics, superposition of symmetry groups in - 95.
Crystals, equilibrium form in a gravitational field - 583.
Crystal-structure analysis, direct methods of, in relation to structure amplitudes - 346.
Crystal structure of steel during cold work and heat treatment - 515.
Crystal structure of the compounds $MoBe_{12}$, WBe_{12} and $TaBe_{12}$ - 730.
Crystal structure of the metastable phase formed during the tempering of Cu – Sn alloys containing 24-27% Sn - 277.
Crystal structures of complex compounds - 403.
Crystal structures of diphenyl halogen compounds - 378.
Crystal structures of diphenyliodonium halides - 45.
Crystal structures of trans-diisothiocyanotetrammine-nickel - 230.
Cu-Ag, electron diffraction study of decomposition of supersaturated solid solutions - 610.
Cu-Al, electron diffraction study of decomposition of supersaturated solid solutions - 610.
Cubic space groups - 712.
Cu-Sn, crystal structure of metastable phase formed during tempering of alloys containing 24-27% Sn - 277.

Dauphine twinning in quartz, optical detection of - 79.
Decomposition of supersaturated solid solution, Al-Cu and Ag-Cu - 610.
Deformation conditions and mechanism of formation of slip bands - 648.
Deformation, plastic, by lattice rotation of crystals - 128.
Determination of the radial-distribution function for atoms in a liquid metallic alloys from electron-diffraction data - 246.
Determination of the structure of celadonite by electron diffraction - 388.
Determination of temperature-conductivity coefficients in crystals of ethylene diamine tartrate - 303.
Development of crystallography in the USSR in the last forty years - 573.
Development of the study of crystal forms - 323.
Dielectric, elastic and piezoelectric properties of single crystals of benzophenone - 699.
Dielectric and piezoelectric properties of polarized ceramic $BaTiO_3$ in its various ferroelectric phases - 115.
Dielectric properties, alteration on exposure to x-rays in Rochelle salt - 293.
Dielectric properties of barium titanate - 115.
Diphenylhalogen compounds, crystal structures of - 378.
Diphenyliodonium halides - 45.
Dislocations in corundum, macroscopic - 183.
Dislocations, macroscopic theory of formation in crystal growth - 587.
Distortions of the crystal lattice in solid solutions - 408.
Distortion, structural, of metals under static and dynamic compression at room and low temperatures - 510.
Dividing mechanisms based on the crystallographic principle of the close packing of geometrically identical bodies - 163.
Domains in Rochelle salt, optical study of, and theory of ferroelectricity - 522.

Double crystal neutron spectrometer - 626.
Dynamics of certain elementary crystal growth and evaporation processes - 426.

Edge forms and striation on crystals - 158.
Elastic anistropy of isometric crystals in the (hkl) plane - 759.
Elastic, dielectric, and piezoelectric properties of benzophenone - 699.
Elastic shear waves, propagation in a bent crystal - 134.
Electrical properties and real structure of single-crystal germanium films produced by evaporation in vacuum - 53.
Electron diffraction analysis of the molecular structures of halides of group II elements - 472.
Electron diffraction analysis of the processes of decomposition of supersaturated solid solutions in systems Al – Cu and Ag – Cu, - 610.
Electron-diffraction data, use in determining the radial distribution function in a liquid alloy - 246.
Electron diffraction, determination of the structure of celadonite by - 388.
Electron diffraction investigation of phase transitions in thin films of metals and oxides - 480.
Electron diffraction investigation of polymers. IV. A study of the structural changes in poly-chlorotrifluoroethylene in the crystalline melting point range - 615.
Electron-diffraction method of determination of lattice constants - 679.
Electron-diffraction pattern reflections, intensity of - 334.
Electron-diffraction structural analysis - 551.
Electron diffraction study by reflection of powder samples of celadonite - 173.
Electron diffraction study of amorphous antimony sulfide - 251.
Electron diffraction study of InSb films - 281.
Electron diffraction study of molybdenum nitrides - 169.
Electron diffraction study of nitrides and carbides of transition metals - 380.
Electron-diffraction study of the oxidation of aluminum alloys - 620.
Electron diffraction study of the structure of thin films of molten tin - 240.
Electron diffraction, theory of the radial distribution method - 24.
Electrophotography on photoelectrets - 125.
Epitaxy of $KMnO_4$ and $KClO_4$ on barytes - 706.
Equilibrium form of crystals in a gravitational field - 583.
Etch figures, formation in an ultrasonic field - 309.
Etch pits on slip lines and on the boundaries of polygonal blocks in silver chloride crystals - 544.
Ethylenediamine tartrate, temperature-conductivity coefficients - 303.
Evaporation and crystal growth, dynamics of - 426.
Excitation of ultrasonic vibrations in quartz - 296.
Experimental data on the nature of the formation of etched figures in an ultrasonic field - 309.
Experiments in the kinetics of softening of TlBr-TlI crystals - 742.

Fedorov groups, generalization of - 10.
Fedorov groups, mosaics for - 16.
Fe-Ni alloys, neutron diffraction study - 59.
Ferrocene derivatives, x-ray study of - 376.
Ferroelectricity, theory of, and optical study of domains in Rochelle salt - 522.
Ferroelectric phases of barium titanate - 115.
Ferroelectrics, perovskite-type, structural coefficients of the internal field - 630.
Fibrous proteins - 467.
Films, germanium, single-crystal, electrical properties and structure - 53.
Films, InSb, electron diffraction study of - 281.
Films of metals and oxides, electron diffraction study of phase transitions - 480.
Films, PbS, oxide formation and photoresistance of - 494.
Finite bodies, symmetry and antisymmetry - 5.
Fluogermanate, cobaltous, hexahydrate, structure - 602.
Fluorite, crystallographic criteria for selection for growing crystals of optical - 152.
Formation of spherulites - 422.
Fourier synthesis, two-dimensional, automatic method for - 353.

Gamma-spectrometers, scintillation, photoelectric multiplier for - 286.
Generalization of Fedorov groups - 10.
Geometric crystallography, course for physicists - 667.
Germanium, single-crystal films, electrical properties and structure - 53.
Glass, fine structure of, and atomic chains - 487.
Glide lines, plastic deformation of crystals without formation of - 128.
Gold oxide, Au_2O_3, structure - 674.
Grain boundaries, methods of studying structures and phase composition - 687.
Graphite, spherulitic, in high-strength cast-iron - 653.
Gravitational field, equilibrium form of crystals in - 583.

Group II elements, electron-diffraction study of halides - 472.
Growing uniform crystals of Rochelle salt from strongly supersaturated solutions - 188.
Growth, spiral, silicon crystals - 439.

Halides of group II elements, electron-diffraction determination of structure - 472.
Halogen diphenyl compounds - 45, 378
Hardness, anisotropy in PbS crystals - 702.
Hexaborides, crystal chemistry of - 284.
H_2O-SiO_2-Na_2CO_3, phase equilibria at high temperatures and pressures - 659.
Hydrothermal synthesis of scheelite - 191.

Impurity spectra of crystals, vibrational structure of - 180.
Impurity trapping in single crystals, mechanical agitation and ultrasonic vibrations - 193.
Indium antimonide films, electron diffraction study - 281.
Influence of deformation conditions on the mechanism of the formation of slip bands - 648.
Inhomogeneity of stress distribution in the grain of a polycrystal in the initial stage of plastic deformation - 301.
Initial forms of spherulites - 578.
Instrument for the mechanical determination of the separation between lattice planes - 597.
Intensity of electron diffraction pattern reflections (general case) - 334.
Investigation of the anisotropy of hardness of single crystals of PbS by scratching - 702.
Investigation of phase equilibria in a part of the system $H_2O - SiO_2 - Na_2CO_3$ at high temperatures and pressures - 659.
Iridium-antimony system, metallographic and x-ray study - 42.
Iron, cast, high-strength, morphology of spherulitic graphite in - 653.
Iron-nickel alloys, neutron diffraction study - 59.
Internal field in perovskite-type ferroelectrics, structural coefficients of - 630.

Kinetics of crystallization at constant temperature and supersaturation - 745.
Kinetics of softening of TlBr-TlI crystals - 742.
$KMnO_4$ and $KClO_4$, epitaxy on barytes - 706.

Lattice constants, method of determination by electron diffraction - 679.
Lattice parameters of single crystals, x-ray diffraction camera for precise measurement - 694.
Lattice planes, instrument for mechanical determination of spacing between - 597.
Lattice rotation, plastic deformation of crystals caused by - 128.
Layered-spiral growth - 146.
Lead sulfide crystals, anisotropy of hardness in - 702.
Lead sulfide films, oxide formation and photoresistance - 494.
Lead titanate-barium stannate system - 225.
Liquid alloy structure, determination of the radial distribution function from electron-diffraction data - 246.

Macroscopic edge dislocations in a corundum crystal, 183.
Macroscopic theory of the formation of dislocations in crystal growth - 587.
Mechanical agitation and impurity trapping in single crystals - 193.
Mechanism of structure transformations in age-hardening alloys based on nickel - 414.
Mechanisms, dividing, based on close packing - 163.
Melting of poly(chlorotrifluoroethylene), electron diffraction study - 615.
Memorial to Viktor Ivanovich Mikheev - 199.
2-Mercaptobenzothiazole - 33.
Metal and oxide films, electron diffraction study of phase transitions - 480.
Metals, structural distortion of, under static and dynamic compression at room and low temperatures - 510.
Metallographic and x-ray diffraction study of alloys in the antimony-iridium system - 42.
Method for the determination of crystal lattice constants by electron diffraction patterns from the surface of an object - 679.
Method for determining the amplitudes of the thermal vibrations of the various kinds of atoms in solid solution - 606.
Methods of studying structure and phase composition of grain boundaries - 687.
Method of testing small samples in compression and stress relaxation - 734.
Methylene blue, adsorption on montmorillonite - 68.
Minerals, x-ray diffraction determinative table of - 463.
Mikheev, Viktor Ivanovich, memorial to - 199.
$MoBe_{12}$, structure - 730.
Molybdenum nitrides, electron diffraction study - 169.
Monochromatization of the reflected x-ray beam - 692.
Montmorillonite, adsorption of methylene blue on, and oriented aggregation of - 68.
Morphology, development of study - 323.

Morphology of spherulitic graphite in high-strength cast iron - 653.
Mosaics for 46 plane (Shubnikov) antisymmetry groups and for 15 (Fedorov) color groups - 16.
Mosaic structure in Be-Cu, changes during ageing - 500.

Na_2CO_3-H_2O-SiO_2, phase equilibria at high temperatures and pressures - 659.
Nature of chemical bond and coordination number - 176.
Nature of polarization in crystals of impure Rochelle salt - 290.
Neutron diffraction study of iron–nickel alloys of the permalloy class - 59.
Neutron spectrometer, double crystal - 626.
New method of producing very high gas pressures - 195.
New silicate structures - 361.
New simple forms of pyrite - 307.
Nickel alloys, age-hardening, mechanism of structure transformation - 414.
Nickel complexes, acid-amine, crystal structures of - 366.
Nickel-iron alloys, neutron diffraction study - 59.
$Ni(NH_3)_4(SCN)_2$, trans, crystal structures of - 230.
Nitrides, molybdenum, electron diffraction study - 169.
Nitrides of transition metals, electron diffraction study of - 380.
Nucleation surfaces, symmetry, antisymmetry, and pseudosymmetry of - 19.

Observation on layered-spiral growth of crystals from solutions - 146.
Optical detection of Dauphine twinning in quartz - 79.
Optical fluorite, crystallographic criteria for selecting fluorspar for growing - 152.
Optical study of domains in Rochelle salt and theory of ferroelectricity - 522.
Organic crystal chemistry, concepts of - 454.
Organic pigment crystals, anomalous bisectrix dispersion in - 75.
Oriented aggregation of montmorillonite - 68.
Oriented crystallization of $KMnO_4$ and $KClO_4$ on barytes - 706.
Oscillating crystals, apparatus for measuring very small displacement of - 643.
Oxide formation and photoresistance of lead sulfide films, - 494.

Packing of chain molecules. II. The layers of paraffin molecules - 637.
Paraffin molecules, packing in layers of - 637.
PbS crystals, anisotropy of hardness in - 702.
PbS films, oxide formation and photoresistance - 494.
$PbTiO_3$-$BaSnO_3$ system - 225.
Peculiarities of collagen structure - 467.
Permalloy, neutron diffraction study - 59.
Perovskite-type ferroelectrics, structural coefficients of the internal field - 630.
Phase composition and structure of grain boundaries - 687.
Phase equilibria at high temperatures and pressures in system H_2O-SiO_2-Na_2CO_3 - 659.
Phase transitions at very high pressures - 533.
Phase transitions in thin films of metals and oxides, electron diffraction study - 480.
Photoelectric multiplier for scintillation gamma-spectrometers - 286.
Photoelectrets, electrophotography on - 125.
Photoelectrets, polycrystalline, limiting point groups of - 697.
Photoresistance of PbS films and oxide formation - 494.
Piezoelectric, dielectric, and elastic properties of benzophenone - 699.
Piezoelectricity of wood - 104.
Piezoelectric properties of barium titanate - 115.
Piezoelectric shear modulus of polarized barium titanate - 111.
Piezoelectric properties of crystals, symmetry, and textures - 86.
Physical interpretation of the point groups - 718.
Plane groups, antisymmetric and colored, mosaics for - 16.
Plant transitions and critical phenomena in anisotropic phases- 139.
Plastic deformation of crystals caused by rotation of the lattice without formation of glide lines - 128.
Plastic deformation of polycrystals - 301.
Platinum dioxide, structure - 677.
Point groups with antisymmetry operations- 5.
Point groups and their physical interpretation - 718.
Point groups of polycrystalline photoelectrets - 697.
Point groups of symmetry of crystals and their physical interpretation - 718.
Polarization, nature of, in crystals of impure Rochelle salt - 290.
Poly(chlorotrifluoroethylene), structural changes in melting point range, electron diffraction study - 615.
Polycrystals, plastic deformation of - 301.
Polymers, electron-diffraction study - 615.
Possibility of optical detection of Dauphine twinning in quartz - 79.

Potassium permanganate and perchlorate, epitaxy on barytes - 706.
Pressure, very high, phase transitions at - 533.
Pressures, very high, method of production in gas - 195.
Primitiveness of unit cells of lattices - 715.
Problem of the effect of mechanical agitation and ultrasonic vibrations on the process of impurity trapping by single crystals - 193.
Procedures of studying the structures and phase compo ition of grain boundaries - 687.
Propagation of elastic shear waves in a crystal bent around a specific direction - 134.
Proteins, fibrous - 467.
Pseudosymmetry of nucleation surfaces - 19.
Pt (II) complexes, crystal chemistry - 395.
$Pt(NH_3)_2(SCN)_2$, cis, crystal structure - 270.
$Pt(NH_3)_2(SCN)_2$, trans, crystal structure - 274.
PtO_2, structure - 677.
Pyrite, some new simple forms of - 307.

Quartz, excitation of ultrasonic vibrations in - 296.
Quartz, optical detection of Dauphine twinning in - 79.

Radial distribution function, determination in a liquid metallic alloy from electron-diffraction data - 246.
Radial distribution method, theory of - 24.
Radioactive tracers, study of activator distributions in alkali halide crystals - 435.
Refractometric determination of the structure of complex cobalt compounds - 259.
Representation of crystal atoms as symmetrical bodies - 445.
Rochelle salt crystals, alteration in dielectric properties on exposure to x-rays - 293.
Rochelle salt, growing uniform crystals of - 188.
Rochelle salt, impure, nature of polarization in - 290.
Rochelle salt, optical study of domains, and theory of ferroelectricity - 522.
$[Ru(NH_3)_4(NO)(OH)]Cl_2$, structure - 681.

Sb-Ir system, metallographic and x-ray study - 42.
Sb_2S_3, amorphous, electron diffraction study - 251.
Scalar fields, effect on symmetry of isotropic media - 330.
Scheelite, hydrothermal synthesis of - 191.
Scintillation gamma-spectrometers, photoelectric multiplier for - 286.
Shfranovskii, Illarion Illarionovich, 50th birthday - 665.
Shear modulus, piezoelectric, of polarized barium titanate - 111.
Shear waves, propagation in a bent crystal - 134.
Shubnikov, Aleksei Vasil'evich - 1.
Shubnikov groups - 311.
Shubnikov groups, mosaics for - 16.
Significance for the theory of ferroelectricity of the optical study of domains in Rochelle salt - 522.
Silicate structures, new - 361.
Silicon crystals, spiral growth of - 439.
Silicon steel, annealed, state of carbon in - 684.
Silver chloride crystals, etch pits on - 544.
Silver chloride crystals, slip lines in - 265.
Silver-copper, electron diffraction study of decomposition of supersaturated solid solutions - 610.
Single-crystal films, germanium, electrical properties and structure - 53.
Single crystals, impurity trapping by, and mechanical agitation and ultrasonic vibrations - 193.
Single crystals, x-ray diffraction determination of thermal expansion - 505.
SiO_2-Na_2CO_3-H_2O, phase equilibria at high temperatures and pressures - 659.
Single crystal x-ray diffraction camera for precise determination of lattice parameters - 694.
Slip lines in silver chloride crystals - 265.
Sodium potassium tartrate crystals, alteration in dielectric properties on exposure to x-rays - 293.
Sodium potassium tartrate, growing uniform crystals of - 188.
Sodium potassium tartrate, impure, nature of polarization in - 290.
Sodium potassium tartrate, optical study of domains, and theory of ferroelectricity - 522.
Softening of TlBr-TlI crystals, kinetics - 742.
Solid solutions, determination of amplitudes of thermal vibrations in - 606.
Solid solutions, supersaturated, decomposition of, Al-Cu and Ag-Cu - 610.
Slip bands, influence of deformation conditions on mechanism of formation - 648.
Slip lines and boundaries of polygonal blocks etch pits on, in silver chloride crystals - 544.
Sodium potassium tartrate, optical study of domains, and theory of ferroelectricity - 522.
Solid solutions, lattice distortions in - 408.
Space groups, generalization of - 10.
Space-group theory - 311, 712.
Spacing between lattice planes, instrument for mechanical determination of - 597.
Spectra, absorption, of crystals containing isomorphic impurities, vibrational structure of - 180.
Spectrometer, neutron, double crystal - 626.
Spherulites, formation of - 422.
Spherulites, initial forms of - 578.
Spiral growth, layered - 146.
Spiral growth of silicon crystals - 439.

Stannate, barium-lead titanate system - 225.
State of carbon in annealed silicon steel - 684.
State of fixation of the cations of methylene blue on the crystals of montmorillonite and the capacity of the latter to form oriented aggregates - 68.
Steel, change in crystal structure during cold work and heat treatment - 515.
Steel, silicon, annealed, state of carbon in - 684.
Stress distribution, inhomogeneity in the grain of a polycrystal during plastic deformation - 301.
Striations and edge forms on crystals - 158.
Structural analysis by electron diffraction - 551.
Structural changes in poly(chlorotrifluoroethylene) in melting point range, electron diffraction study - 615.
Structural coefficients of the internal field in ferroelectrics with the perovskite-type structure - 630.
Structure amplitudes and methods of direct crystal-structure analysis - 346.
Structure and phase composition of grain boundaries - 687.
Structure of crystals of cobaltous hexafluogermanate hexahydrate $[Co(H_2O)_6][GeF_6]$ - 602.
Structure of the oxide Au_2O_3 - 674.
Structure of the oxide PtO_2 - 677.
Structure transformations in age-hardening nickel alloys - 414.
Study of phase transformations at very high pressures - 533.
Study of slip lines in silver chloride crystals - 265.
Superposition of symmetry groups in crystal physics - 95.
Survey of electron diffraction structural analysis - 551.
Symmetry, antisymmetry and pseudosymmetry of nucleation surfaces - 19.
Symmetry groups in crystal physics, superposition of - 95.
Symmetry groups of polycrystalline photoelectrets - 697.
Symmetry of homogeneous, continuous isotopic media in tensor, vector and scalar fields - 330.
Symmetry and piezoelectric properties of crystals and "textures" - 86.
Symmetry of scalars, vectors, and tensors of second rank - 202.
Symmetry and various kinds of antisymmetry of finite bodies - 5.
Synthesis, hydrothermal, of scheelite - 191.

$TaBe_{12}$, structure - 730.
Table of x-ray diffraction determinative data for minerals - 463.
Tartrate, ethylenediamine, temperature-conductivity coefficients - 303.
Tartrate, sodium potassium, alteration in dielectric properties of crystals on exposure to x-rays - 293.
Tartrate, sodium potassium, growing uniform crystals of - 188.
Tartrate, sodium potassium, impure, nature of polarization in - 290.
Tartrate, sodium potassium, optical study of domains, and theory of ferroelectricity - 522.
Temperature-conductivity coefficients in crystals of ethylenediamine tartrate - 303.
Tempering of Cu-Sn alloys, crystal structure of metastable phase from alloys containing 24-27% Sn - 277.
Tensor and vector symmetry - 202.
Tensor fields, effect on symmetry of isotropic media - 330.
Testing small samples in compression and stress relaxation - 734.
Tetrahedral (T = 23) and gyrohedral (O = 432) groups - 712.
Textures, symmetry, and piezoelectric properties of crystals - 86.
Theorem on the primitiveness (emptiness) of the unit cell of a crystal lattice - 715.
Theory of the radial distribution method - 24.
Theory of the relation between structure amplitudes and methods of direct analysis of crystal structures - 346.
Thermal expansion of single crystals, x-ray diffraction determination - 505.
Thermal vibrations, determination of amplitudes in solid solutions - 606.
Thin films, tin, structure of - 240.
Tin, structure of thin films - 240.
Tin-copper alloys, crystal structure of metastable phase - 277.
Titanate, barium, piezoelectric shear modulus - 111.
Titanate, barium, polarized ceramic, dielectric and piezoelectric properties of - 115.
Titanate, lead-barium stannate system - 225.
TlBr-TlI crystals, kinetics of softening - 742.
Trans-diisothiocyanotetrammine-nickel, crystal structures of - 230.
Trans-effect and crystal chemistry of platinum complexes - 395.
Transition metal nitrides and carbides, electron diffraction study of - 380.
Transitions, plant, and critical phenomena in anisotropic phases - 139.
Transverse vibrations, propagation in a bent crystal - 134.
Twinning, Dauphine, optical detection in quartz - 79.

Two-dimensional syntheses, automatic method for - 353.
Two limiting point groups of symmetry of polycrystalline photoelectrets - 697.

Ultrasonic field, formation of etch figures in - 309.
Ultrasonic vigrations and impurity trapping in single crystals - 193.
Ultrasonic vibrations, excitation in quartz - 296.
Unit cells, primitiveness of - 715.
USSR, development of crystallography in last 40 years - 573.

Valence theory and coordination number - 176.
Vanadium bronzes, crystal chemistry of - 219.
Vanadium bronzes, sodium and potassium - 211.
Vector and tensor symmetry - 202.
Vector fields, effect on symmetry of isotropic media - 330.
Very high gas pressures, method of producing - 195.
Vibrational "structure" of absorption spectra of crystals whose coloration is due to isomorphic impurities - 180.
Vibrations, thermal, determination of amplitudes in solid solutions - 606.

WBe_{12}, structure - 730.
Wood as a piezoelectric texture - 104.

X-ray beam, reflected, monochromatization of - 692.
X-ray diffraction analysis of the changes in mosaic structure during the ageing of beryllium copper - 500.
X-ray diffraction camera for precise measurement of the unit cell parameters of single crystals RKM-114 - 694.
X-ray diffraction determination of the thermal expansion of single crystals - 505.
X-ray diffraction determinative table of minerals - 463.
X-ray diffraction structure determination of cobalt diparatoluidin-dichloride - 723.
X-ray diffraction study of sodium and potassium oxygen vanadium bronzes $Me_{0.33}V_2O_5$ - 211.
X-ray diffraction study of the structural distortion of metals under static and dynamic compression at room temperature and low temperature - 510.
X-ray examination of captax (2-mercaptobenzothiazole) - 33.
X-ray investigation of crystals of some ferrocene derivatives - 376.
X-rays, alteration in dielectric properties of Rochelle crystals on exposure to - 293.
X-ray structural analysis of crystals of $[Ru(NH_3)_4(NO)(OH)]Cl_2$ - 681.
X-ray study of the xyxtem $PbTiO_3 - BaSnO_3$ - 225.
